

# IPS Eris™

Conventionally Cemented.  
Unconventionally Beautiful.

## Why IPS Eris™?

Now you can get the **Ultimate in Metal-Free Esthetics** with the **convenience of conventional cementation**

- Fluorapatite glass ceramic mimics natural translucency, brightness and shades providing life-like esthetics.
- Indicated for crowns and bridges.
- High strength lithium disilicate framework ensures clinical reliability.
- Metal-free for outstanding esthetics.
- Conventionally cemented\* or adhesively placed.
- Part of the IPS Empress® family, your assurance of esthetics.

\* For conventional cementation, use a low expanding (less than 1%) cement (eg. Type I glass ionomer)
